the truth is over time our feelings in our relationships do change the sparkly and exhilarating rush of falling in love is not permanent but that does not mean that this feeling disappears it simply evolves the idea that the excitement of a relationship is sentenced to only the first months or even years a couple is together is completely false sometimes we are so excited about our beloved that we can't think straight or believe that life would be meaningless without our lover it is times like these where we wonder whether love is an addiction or just some happy feelings we experience we also notice how rapidly those happy feelings disappear as we sullenly withdraw our love because of the broken heart we're afraid to experience being in love brings out the best the mess the good the bad the ugly and the sensational love also ignites a sexual side of ourselves that we typically have not experienced with anyone before there is no greater freedom security sense of purpose or sexual energy like that with our new lover but deep within the recesses of our mind we wonder whether what we are experiencing is love or just lust
